

QiMAX

BENEFIT	FEATURE
---------	---------

**SUPERIOR
FEEL AND
SOUND**

What the golfers perceive as feel is largely the result of the sound the club makes at impact. The two areas most responsible for sound and feel are the top line and the face. In the Qi MAX, a new internal stability bar and ECHO® Damper material have been strategically positioned to support these areas, reduce vibrations, and deliver premium feel in a game improvement iron.

**STRAIGHT
DISTANCE**

Proven TaylorMade patented face technology controls face flexibility to reduce “cut” spin that can result from fast face iron designs, allowing golfers to experience straighter shots throughout the entire set.

**INDIVIDUAL
HEAD
OPTIMIZATION**

Each head has been designed to deliver specific performance for that individual iron. Starting with a foundation of maximum distance and forgiveness, the face design is tailored to deliver the launch and spin needed for straight, consistent shots with each iron.

**OPTIMIZED
BALL FLIGHT**

FLTD CG™ strategically places the CG lowest in the long irons and higher as the set progresses. The design produces enhanced launch and playability in the long irons and precision and control in the scoring clubs.

**REFINED
PLAYERS
SHAPE**

Refined shaping reflects internal tech features to create an aspirational players look. Shaping includes a confidence-inspiring thinner top line and blade length that blend seamlessly with a reduced offset hosel.

Qi MAX HL

BENEFIT	FEATURE
SUPERIOR FEEL AND SOUND	What the golfers perceive as feel is largely the result of the sound the club makes at impact. The two areas most responsible for sound and feel are the top line and the face. In the Qi MAX HL, a new internal stability bar and ECHO® Damping material has been strategically positioned to support these areas, reduce vibrations, and deliver premium feel in a game improvement iron.
STRAIGHT DISTANCE	Proven TaylorMade patented face technology controls face flexibility to reduce “cut” spin that can result from fast face iron designs, allowing golfers to experience straighter shots throughout the entire set.
INDIVIDUAL HEAD OPTIMIZATION	Each head has been designed to deliver specific performance for that individual iron. Starting with a foundation of maximum distance and forgiveness, the face design is tailored to deliver the launch and spin needed for straight, consistent shots with each iron.
FORGIVING SHAPE	Qi Max HL irons use a new oversized head shape to deliver confidence and forgiveness for the game improvement player. Designed with a taller face height, increased blade length, and wider sole help to create our most forgiving iron. The Qi Max HL delivers visual confidence using a thicker topline, increased offset and larger face area.
HIGHER LAUNCH AND MORE SPEED	The new Qi HL (Higher and Lighter) is designed with weaker lofts and an lightweight component package. Perfect for players who can benefit from a higher launch, more spin and increased clubhead speed to help maximize carry distance and accuracy. Available using an ultra lightweight graphite with an overall club mass up to 56g lighter than Qi Max.

CLUB	5	6	7	8	9	PW	AW	SW
